CUSTOMER INFORMATION

1. Estimated Award Value : $ 500000

Base Period :$ 125000
Option Period 1 :$ 125000
Option Period 2 :$ 125000
Option Period 3 :$ 125000

2. Solicitation Number : 47QSMD20R0001

3. Contract Period : N/A

4. Business Size : Small Business

5. Business Types :

27 - Small Disadvantaged Business
2X - For-Profit Organization
23 - Minority Owned Business
PI - Hispanic American Owned

6. Subcontracting Plan Type : N/A **and Expiration :** N/A

7. Items Awarded (SIN):

SIN	Description	Large Category	Subcategory
518210C	Cloud Computing and Cloud Related IT Professional Services	Information Technology	IT Solutions
54151	Software Maintenance Services	Information Technology	IT Solutions
54151S	Information Technology Professional Services	Information Technology	IT Solutions

8. Escalation Rates :
EPA Clause I-FSS-969(b)(1) - Fixed Escalation - 4.1%

9. IFF Statement :
552.238-80 Industrial Funding Fee and Sales Reporting (JUL 2020)

10. Minimum Order Limit : $ 100

11. Maximum Order Limit : $ 500000

12. Geographic Coverage :
SIN Scope

SIN	Scope
518210C	W - Worldwide
54151	W - Worldwide
54151S	V - 48 States, DC

13. Prompt payment Discounts :
Discount1 : 00.000 % if Payment is made within 00 days
Discount2 : 00.000 % if Payment is made within 00 days
Net 30 days.

Volume Discounts :
None

14. MFC (Most Favored Customer)/BOA (Basis of Award) Customer :
All Commercial Customers

15. Approved Exceptions :
QUANTICA TECHNOLOGIES INC. offer dated May 14, 2024 and Final Proposal Revision dated July 15, 2024, submitted in response to standing Solicitation No 47QSMD20R0001, for Multiple Award Schedule MAS, is hereby accepted by the Government.

APPENDIX B – LABOR CATEGORY DESCRIPTIONS

SIN	Labor Category	Description	Minimum Education	Min Years of Experience
54151S - Information Technology Professional Services	Business/Data Analyst I	Works collaboratively with internal and external stakeholders to develop processes and other artifacts comprehensively articulating functional and non-functional requirements. Supports data collection, cleaning, standardization, transformation, modeling, and reporting strategies. Works collaboratively with cross-functional teams to identify and develop solution requirements. Assists in applying sound data processing principles. Maintains records and generates reports to track business operation, analytics and relevant trends.	Bachelors	3
54151S - Information Technology Professional Services	Business/Data Analyst II	Works collaboratively with internal and external stakeholders to turn data into information, information into actionable insights and insights into business decisions. Demonstrates advanced skills in data analysis, technology initiatives, and project management. Contribute to the development and implementation of comprehensive solutions and data strategies, ensuring alignment with government regulations. Actively engages with stakeholders, providing valuable insights into requirements definition, solution development, planning and execution of data-related initiatives. Supports definition of government business practices and incorporates processes into automated and business intelligence and analytics solutions.	Bachelors	6
54151S - Information Technology Professional Services	Business/Data Analyst III	Expert in business and data analysis, leads federal programs and projects with a strategic approach. Provides guidance on complex technology initiatives and solutions, oversees advanced data architectures and analytics, and ensures adherence to stringent government regulations. Works collaboratively with internal and external customers to turn data into information, information into actionable insights and insights into business decisions. Prepares milestone status reports and presentations for stakeholders. Coordinates all aspects of complex applications automation and business intelligence and analytics initiatives.	Masters	10
54151S - Information Technology Professional Services	Technology Consultant I	Plays a supporting role in various aspects of technology and data-related initiatives. Participates in software development, interface design, requirements implementation. Collaborates on testing, coding, and debugging. Supports teams in developing digital strategies, operational, business intelligence, big data and artificial intelligence solutions. Responsibilities include assisting in the creation of user interfaces and software modules. collaborating on data model development, data transformation processes, and analytical solutions.	Bachelors	3

54151S - Information Technology Professional Services	Technology Consultant II	Oversees various dimensions of software development, interface design, data modelling, and requirements implementation within technology projects. Leads architecture design, coding, and debugging, ensuring product functionality and quality. Contributes significantly to product development, project planning, execution, and problem-solving, leveraging expertise in coding, data management and operational and artificial intelligence-related software solutions. Leverages multiple development platform frameworks, impacting system architectures, and developing novel features.	Bachelors	6
54151S - Information Technology Professional Services	Technology Consultant III	Leads software development, interface design, and requirements implementation for technology projects. Guides architecture design, coding, and debugging processes, resolves complex system-wide technical challenges. Responsibilities may include the development of large software solutions, data collection and analysis efforts, business intelligence, advanced data analytics, complex data architectures, lead strategic reports and oversee comprehensive project lifecycles.	Masters	10
54151S - Information Technology Professional Services	Program Manager I	Supports federal projects, responsible for coordinating and overseeing various project phases. Develops project plans, timelines, and budgets in collaboration with cross-functional teams. Closely tracks and monitors project progress, conducts risk assessments, and ensures adherence to federal regulations. Assists in stakeholder communication and reporting, playing a pivotal role in the initiation and planning phases. Drives the program level decomposition of work across delivery teams. Works across organizational boundaries to define program interdependencies and release plans.	Bachelors	3
54151S - Information Technology Professional Services	Program Manager II	Oversees projects while managing complexities through various phases. Develops comprehensive project strategies, leads cross-functional teams, and ensures successful execution. Engages in risk management, resource allocation, and stakeholder communication. Drives coordinated management of interdependent projects, ensuring alignment with business goals. Facilitates program-level decomposition of work, defines interdependencies, and release plans. Identifies impacted areas, maintains detailed project plans, and tracks deliverables. Resolves program-level issues, facilitates executive escalations, and manages change effectively. Partners with initiative sponsors, align metrics with goals, and establishes program roadmaps for efficient delivery.	Bachelors	6

54151S - Information Technology Professional Services	Program Manager III	Oversees projects with high complexity and strategic importance. Leas large-scale initiatives, managing multiple projects simultaneously, and developing organizational project management standards. Navigates regulatory landscapes, ensures compliance, and collaborates with executive leadership to shape project success. Drives coordinated management of interdependent projects, defines interdependencies, and engages appropriate resources. Builds and maintains detailed project plans, track deliverables, and ensure alignment with program goals. Facilitates resolution of program-level issues, executive escalations, and change management. Partners with initiative sponsors to understand program vision and align metrics with goals. Establishes and prioritizes program roadmaps, monitors delivery, and proactively address impediments. Leads program-level communications, including roadmap changes and delivery status updates. Manages risk throughout project lifecycle and oversee project communications among partners.	Masters	10
518210C - Cloud and Cloud-Related IT Professional Services	Software as a Service (SAAS) Analyst - Cloud-Related IT Professional Services	Plays a key role in configuring, optimizing and enhancing cloud based SAAS platforms such as Salesforce and ServiceNow and business intelligence tools such as PowerBi, Tableau and Palantir, among others to meet business needs. Responsibilities include collaborating with stakeholders, analyzing user requirements, designing and implementing solutions, and providing ongoing support. Customizes features, creates reports and dashboards, migrates data and ensures data integrity. Stays updated on SAAS developments and industry best practices to recommend enhancements. Collaborates with cross-functional teams for streamlining processes and maximizing the platform's effectiveness. Possesses business analysis experience, Salesforce, ServiceNow or business intelligence tools configuration skills, and project/client management expertise, including creating user stories and working within Agile environments.	Bachelors	5
518210C - Cloud and Cloud-Related IT Professional Services	Software as a Service (SAAS) Specialist - Cloud-Related IT Professional Services	Designs and implements cloud based SAAS, business intelligence solutions and platforms such as Salesforce, ServiceNow, Tableau, PowerBI and Palantir solutions, among others in alignment with business goals. Collaborates with stakeholders, gathering requirements, and translating them into scalable solutions. Leads platform configuration, ensuring seamless integration with existing systems. Validates proposed designs and oversees the implementation of solutions. Works with clients to understand their functional and technical requirements to engineer solutions. Enforces use of industry-accepted best practices and development standards to ensure quality delivery. Stays current with SAAS best practices, support mechanisms, procedures and limitations.	Bachelors	7

518210C - Cloud and Cloud-Related IT Professional Services	Software as a Service (SAAS) Solutions Architect - Cloud-Related IT Professional Services	Responsible for designing and implementing cloud based SAAS solutions at scale in alignment with business goals. Validates proposed designs, leads and oversees the implementation of multiple platforms, business intelligence and solutions such as Salesforce, ServiceNow, Tableau, PowerBI and Palantir, among other platform and BI solutions. Offers a deep understanding of platforms architecture, experience in large and complex implementations, and the ability to communicate technical concepts effectively to non-technical stakeholders. Leads enterprise architecture, solution design, integration strategy, and continuous adherence to industry best practices and development standards. Enforces use of industry-accepted best practices and development standards to ensure quality delivery. Stays current with new SAAS platforms best practices, support mechanisms, procedures and limitations.	Bachelors	8
518210C - Cloud and Cloud-Related IT Professional Services	Software as a Service (SAAS) Senior Architect/Project Manager - Cloud-Related IT Professional Services	Oversees complex cloud based SAAS projects and architects' enterprise-wide solutions. Role involves strategic project management, aligning business goals with technical requirements, and providing overall guidance for SAAS and Business Intelligence platforms implementations. Leads the analysis of business processes, gathering requirements, and translating them into scalable architectures. Oversees analytics solutions implementations in Salesforce, ServiceNow, PowerBI, Tableau, Palantir among other SAAS and BI tools. Oversees the project lifecycle ensuring seamless integration with existing systems and maximizing platform capabilities. Drives the coordination of interdependent projects, manages resources, and ensures successful delivery within specified timelines and budgets. As Senior Architect, assesses current architecture, designs secure and high-performance technical solutions.	Bachelors	8
54151S - Information Technology Professional Services	Administrative/Systems Control Specialist - Equivalent to 14100 COMPUTER SYSTEMS ANALYST (Occupational Base)	Assists in the development and maintenance of technical documents, spreadsheets and presentations. Supports data entry and maintenance of SAAS, cloud solutions and computerized databases. Responsible for data quality reviews and integrity across systems and documentation. Supports basic system level testing. Supports problem resolution through data processing, gathers information from users.	Bachelors	3
54151 - Software Maintenance Services	Business/Data Analyst I	Works collaboratively with internal and external stakeholders to develop processes and other artifacts comprehensively articulating functional and non-functional requirements. Supports data collection, cleaning, standardization, transformation, modeling, and reporting strategies. Works collaboratively with cross-functional teams to identify and develop solution requirements. Assists in applying sound data processing principles. Maintains records and generates reports to track business operation, analytics and relevant trends. Supports systems maintenance.	Bachelors	3

54151 - Software Maintenance Services	Business/Data Analyst II	Works collaboratively with internal and external stakeholders to turn data into information, information into actionable insights and insights into business decisions. Demonstrates advanced skills in data analysis, technology initiatives, and project management. Contribute to the development and implementation of comprehensive solutions and data strategies, ensuring alignment with government regulations. Actively engages with stakeholders, providing valuable insights into requirements definition, solution development, planning and execution of data-related initiatives. Supports definition of government business practices and incorporates processes into automated and business intelligence and analytics solutions. Supports systems maintenance.	Bachelors	6
54151 - Software Maintenance Services	Business/Data Analyst III	Expert in business and data analysis, leads federal programs and projects with a strategic approach. Provides guidance on complex technology initiatives and solutions, oversees advanced data architectures and analytics, and ensures adherence to stringent government regulations. Works collaboratively with internal and external customers to turn data into information, information into actionable insights and insights into business decisions. Prepares milestone status reports and presentations for stakeholders. Coordinates all aspects of complex applications automation and business intelligence and analytics initiatives. Supports systems maintenance.	Masters	10
54151 - Software Maintenance Services	Technology Consultant I	Plays a supporting role in various aspects of technology and data-related initiatives. Participates in software development, interface design, requirements implementation. Collaborates on testing, coding, and debugging. Supports teams in developing digital strategies, operational, business intelligence, big data and artificial intelligence solutions. Responsibilities include assisting in the creation of user interfaces and software modules. collaborating on data model development, data transformation processes, and analytical solutions. Supports systems maintenance.	Bachelors	3
54151 - Software Maintenance Services	Technology Consultant II	Oversees various dimensions of software development, interface design, data modelling, and requirements implementation within technology projects. Leads architecture design, coding, and debugging, ensuring product functionality and quality. Contributes significantly to product development, project planning, execution, and problem-solving, leveraging expertise in coding, data management and operational and artificial intelligence-related software solutions. Leverages multiple development platform frameworks, impacting system architectures, and developing novel features. Supports systems maintenance.	Bachelors	6
54151 - Software Maintenance Services	Technology Consultant III	Leads software development, interface design, and requirements implementation for technology projects. Guides architecture design, coding, and debugging processes, resolves complex system-wide technical challenges. Responsibilities may include the development of large software solutions, data collection and analysis efforts, business intelligence, advanced data analytics, complex data architectures, lead strategic reports and oversee comprehensive project lifecycles. Supports systems maintenance.	Masters	10
